KEY SKILLS

HTML

CSS & SASS

JavaScript ES6

Problem solving

React JS & Typescript

Page builders & widgets

Stencil & Handlebars

Adobe Photoshop

Tailwind

GraphQL

Figma

Git & Github

BASIC SKILLS

Alpine JS

Next JS

Wordpress

Firebase / Firestore

Statamic & Antlers

Unit Testing

Bootstrap

JQuery

Experienced front-end developer with a strong foundation in React and JavaScript. I recently broadened my skill set into project management, leading the roll out of a web-based market trading app. This role enhanced my skills in stakeholder communication, problem-solving, and project oversight, while giving me valuable insight into digital projects from the client perspective.

As my contract concludes, I am eager to return to a hands-on front-end dev role, pursuing my passion for building responsive, user-focused websites.

CAREER

Front-end Digital Application Lead - June 2024 - present npower Business Solutions

A fast-paced role delivering a market trading web app from initial scoping to launch. I **collaborated with stakeholders, agencies, and internal teams** to ensure timely delivery while maintaining alignment with brand standards.

- Communicated with key stakeholders, providing updates and managing expectations.
- Collaborated with an agency to identify and resolve blockers.
- As part of the Marketing team I ensured alignment with brand and coordinated customer journeys and comms.
- Developed front-end React components.
- Delivered demos, training, and support materials to stakeholders.
- Support additional projects, including developing a roadmap by analysing client and stakeholder feedback to prioritise new features.
- Agile working to address bugs, implement changes, and deliver product features.
- Utilise tools such as Monday, Notion and BugHerd.

Front-end Web Developer - Aug 2022 to June 2024 - 5874

Worked collaboratively within a fast-paced development team at an e-commerce agency, contributing to a diverse range of international projects in a variety of programming languages. Starting as a Junior Dev, I showed hard work and a drive for improvement, resulting in a **promotion after 6 months**. My hard work was further recognised when I was given an award for showing real dedication and never giving up.

- Delivered client support by implementing new features, modifying existing sites, and resolving bugs, using Jira for ticket management.
- Built new sites from template themes using Stencil and Handlebars.
- **Developed headless websites** integrated with page builders/CMS (Builder IO, BigCommerce, Statamic).
- Implemented API calls and formatted data.
- Translated Figma designs into **pixel-perfect, responsive** websites.
- Produced semantic and accessible HTML.
- Communicated clearly with PMs and Lead Developers, providing progress updates and flagging blockers.
- Managed version control with Fork.

Code Base: React, Typescript, JS, CSS, Sass, Tailwind, Statamic, Antlers, Handlebars & Alpine JS

Tools: Postman, Fork(Git), Figma, Notion, Adobe XD, Jira & Bit Bucket

Software Development - April 2021 to May 2022 - Nology

I completed a remote front-end development course learning JS, React, CSS, Node.js, Firebase, Jest, and React Testing Library. As part of a live client project, I contributed to a React web app designed to help students reduce the environmental impact of their food choices. My work included building and validating a multi-step form with useForm and Yup Resolver. The project was developed collaboratively using Trello, Figma and GitHub.

Throughout the course I built some of the following projects, please visit my portfolio for links:

- Brew Dog beer finder in React, accessing a public API to render cards for each beer, allowing the user to filter and search results.
- Morse Code translator using HTML, CSS & JS.
- Alien text based game in JS, driven by OOP.
- Hangman, a personal project using JS, HTML & CSS.

Project Coordinator - June 2017 to August 2022 - SE Controls

Coordinated the installation of life safety smoke ventilation systems, addressing issues as they arose and working to find efficient solutions. Progressed from the role of Project Administrator to Senior Administrator, ultimately achieving the position of Project Coordinator.

- Scheduled engineers and found solutions to last minute issues and call outs.
- Communicated with colleagues and other departments to ensure smooth running of projects.
- Provided the Directors with forecasted figures for KPI reports.
- Produced commissioning paperwork for customers, ensuring adherence to company guidelines and maintaining a high standard of quality at all times.
- Organised the delivery of products based on technical drawings.

Reception & Admin Assistant - 2009 to 2017 - Blue Cross

A rewarding role where I built strong communication and problem-solving skills. Supporting the centre's operations through admin and continuous system improvements. Working as a team to rehome horses.

- Delivered training and ongoing support to volunteers, while successfully organising fundraising events
- Produced digital and social media content to increase awareness and support, including video production, centre tours and TV/radio interviews.
- Financial admin including balancing payments as well as various other varied admin.

EDUCATION

2019 - ILM Management Workshop Programme - 9 week course teaching management skills

BA(Hons) Interior Architecture and Design - University of Lincoln - Grade - 2:2

A-levels: IT B, Art A, Design B **GCSEs:** 10 grades A-C, including Maths, English and Science

THINGS I LOVE

If you have any questions then I'd love to hear from you!
